Attachment “A”

Logix Fiber Networks (Logix) has in place multiple steps to protect CPNI from persons attempting to falsely obtain CPNI of another person through pretexting. Logix does not allow web access of CPNI. As a result, all queries are screened by a customer service representative. For all customer-initiated calls, a customer-specific password must be provided before CPNI will be provided to the caller. If a password is not provided, Logix will call the customer’s authorized contact for authorization. Moreover, Logix has included specific language in its employee policies that provide information to all Logix employees regarding Logix’s and the employee’s responsibilities with regard to protecting customer CPNI.
